Case Study 5

Build a Web Site, Part 5

Overview section
In this lab you will begin adding interactivity to your web site.

Objectives section
At the end of this lab you should have:

?? Include interactivity in a web site using JavaScript

Components Section
The components needed for this lab are:

?? A PC connected to the internet
?? HTML Editor or other tool

Lab Length: 4-6 Hours
Lab
1. Design at least one interactive function for your Web site that is appropriate to its content.
2. Program that function and insert it into your web site.
3. Describe your process. Explain the problems you had and what you learned from this exercise.
4. Send your Web pages via email to jrobinson@westnetinc.com.
