Lab 12 (Unit 8)

Company Security Plan

Overview section
This lab will allow a student to enhance their network security experience.

Objectives section
Develop a Network Security Plan for the WestNet Web site.

Components Section
The components needed for this lab are:

?? Access to a text editor like Microsoft Word
?? Access to the internet

Lab Length: 4-6 Hours
Lab
1. Develop a Network Security Plan for the WestNet Web site (www.westnetinc.com). Address issues such as security threats, user awareness training, physical security, encryption, firewalls, etc. Use the internet to research what the web site does and how it could be affected by a good or bad network security plan. Write a complete security plan that details all aspects of network security for this web site.

2. Email your plan to jrobinson@westnetinc.com.
